

In the table below are the parts that make up an anchor tag and an image tag. Write out the code used to create each of examples. (Some parts may be used more than once)

<div style="display: flex; flex-wrap: wrap; gap: 5px;"> href <a = " target > _blank text Google </div> <div style="display: flex; flex-wrap: wrap; gap: 5px; margin-top: 5px;"> www.google.com Google Logo 400 width height </div> <div style="display: flex; flex-wrap: wrap; gap: 5px; margin-top: 5px;"> src 135 <img " title /images/google-logo.png alt </div>	
Example output	HTML Code
	
<p>The text "Google" linked to the website www.google.com. The link should open in a new tab</p>	
	
<p>An image of the Google logo</p>	
	
<p>An image with a link to the Google website</p>	

Styles have been added to the image. Use the parts of code below to write up the code used for the example.

<div style="display: flex; flex-wrap: wrap; gap: 5px;"> img 20px box-shadow { 9px solid lightGrey } </div> <div style="display: flex; flex-wrap: wrap; gap: 5px; margin-top: 5px;"> : linear-gradient ; 10px 10px 10px Grey padding </div> <div style="display: flex; flex-wrap: wrap; gap: 5px; margin-top: 5px;"> border background-image (to bottom, lightBlue, lightYellow) </div>	
Example output	CSS Code
