

Below is the code for making an online quiz, but the code does not run how it should.

Exercise - Identify the **12** lines of code that contain bugs.

	Code with Bugs
1	<!doctype html>
2	<title>Riddles</tilte>
3	
4	<link rel="stylesheet" src="/css/wiki.css">
5	<style>
6	.incorrect {
7	color = red;
8	}
9	</style>
10	
11	<h1>Riddles</h1>
12	
13	<p>What has a head and a tail, but no body?
14	<select id="question 1">
15	<option>the wind
16	<option>a snake
17	<option>a river
18	<option value="correct">a coin
19	</select>
20	
21	<p>What has an eye but cannot see?
22	<select id "question2">
23	<option>no eyed deer
24	<option>value="correct">a needle
25	<option>a blind man
26	<option>a computer
27	</select>
28	
29	<button id="checkButton">check answers</button>
30	
31	<script>
32	checkButton.onClick = function() {
33	
34	var score = 0;
35	var questions = [question1, question2];
36	
37	for (i = 0; i < questions.length; i++) {
38	
39	if (questions[i].value = "correct") {
40	Score++;
41	questions[i].className = "";
42	else {
43	questions[i].classList.add("incorrect");
44	}
45	
46	}
47	
48	alert("You scored " + score + / + questions.length);
49	}
50	</script>
